

# LandNetwork (SPN)

Service Provider Network - Partner in g2

---

Recent and coming activities

# Purpose of association

---

- ❑ Internal and external promotion and joint interests of its Members in the frame GMES.
  - ❑ Advisory and training measures
  - ❑ The medium-term aim is the affiliation to a European Association (i.e. EARSC).
  - ❑ The Association has a non-profit-making character and has no commercial interests.
-

# Members

---

- ❑ Open to operational service providers
  - ❑ Members of the Association might be natural persons or juridical persons.
  - ❑ Participants and stakeholders in the frame of GMES Land related activities.
  - ❑ The number of Members shall not be limited.
  - ❑ Currently: Astrium, EuroSense, GeoVille, GISAT, INDRA, Metria and Planetek are members
-

# Membership and governance

---

- ❑ Membership fee (bank service charges, tax accountant, general insurance)
  - ❑ Currently 1500 Euro/year/member
  - ❑ A yearly general assembly proposes the activities and decide the membership fee
  - ❑ All activities in line with g2 DOW for the SPN
-

# SPN G2 deliverables (DoW)

---

Del. No.	Deliverable name	WP no.	Lead beneficiary of WP	Estimated indicative person month	Nature	Dissem. Level	Review Mile-stone	Delivery Date DoW 15.4	Delivery Date Deviation Report	Delivery Date
SPP-01	Technical notes: proposal for service standards and working practices	12400	SPN (51)	1	R	CO		T0+8		T0+17
SPP -02	Thematic working group meetings	12400	SPN (51)	3	R	CO		T0+14 T0+26 T0+38		T0+20 T0+26 T0+38
SPP -03	Training material and training sessions	12400	SPN (51)	2	R	CO		For each meeting		For each meeting

---

# Activities

---

- Position paper on public tendering process
    - Distributed widely during 2009/2010 and also endorsed by EARSC
  - Prepare a technical note on “Product standards for Earth Observation derived user products” for communication with technical user working groups and decision makers (position paper)
  - Prepare training material and conduct training sessions on GMES Land products (HR-layers)
-

# Land Products training

---

- ❑ MS representatives are still not fully aware and convinced on HR layers may support their existing and future reporting obligations – training needed
  - ❑ SPN proposes an initiative to improve the limited knowledge in MS, to build trust in GMES land related products and services thereby leading to better MS acceptance
-

# Land Products training

---

- ❑ National workshops presenting g2 and HR-layers in operational use
  - ❑ Dialogue promoting further use of HR-layers
  - ❑ Involves a wide range of service providers from different part of Europe
  - ❑ Planned for end 2011-2012
-

# GMES – current status

---

- GIO – open call for tender (EEA)
  - 5 HR layers until 2013
  - Land products standards will be set up
  - Start or end of the process?
-

# Future of GMES - scenarios

---

Scenario 1	Scenario 2	Scenario 3
GIO is the baseline	European engagement only for space & ground segment	Regulation / Directive on a land monitoring service or on GMES in general
GMES dedicated to support EC / EEA	National funding – applications are on the end of the long list of priorities	Access to in-situ data from MS based on framework contracts
MS will adopt the HR layers / UA	MS have not adopted GMES → are not the owner of the process → just lead by EC	MS users involved & active in the process

---

---

Thank you for your attention.
